Pressure Improvement Project
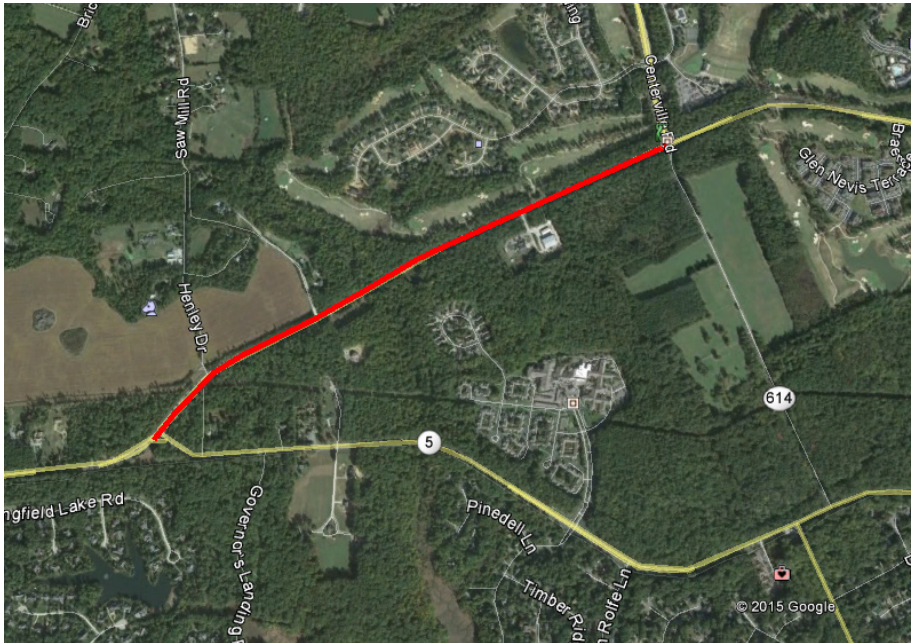

Virginia Natural Gas®
An AGL Resources Company

Project map, affected streets highlighted in red (above)

Governor's Land – James City County

Virginia Natural Gas provides safe and reliable natural gas service to more than 284,000 customers across southeastern Virginia. To ensure that safety and reliability are maintained, we have already made significant enhancements to portions of our natural gas distribution system and we plan to continue by initiating projects to improve low pressure areas of the company's natural gas infrastructure.

The work in your neighborhood is part of the company's natural gas pressure improvement program. This program allows us to make necessary upgrades to our natural gas pipeline system with the expectation of increased safety, reliability and lower operating costs, while supporting the local economy by providing jobs and reducing emissions.

As part of this project, we will install gas main to increase pressures in the area to provide a more reliable system during cold weather months. We will be installing new polyethylene plastic that is less expensive to maintain and more durable. Perhaps best of all, we're ensuring families and business owners have ready access to America's most abundant, environmentally friendly fuel … today and tomorrow.

STREETS AFFECTED – JAMES CITY COUNTY

Monticello Avenue
John Tyler Memorial Highway
Centerville Road
Henley Drive

PROJECT SCOPE

Installation of:
- 6,250' of 8" plastic gas main

OUR COMMITMENT

We understand your time is valuable, so we take great care in implementing construction practices that limit disturbances to homeowners and businesses. We appreciate your patience and understanding as we work to complete this important work.
