

SAVE Pipeline Replacement Project – Thole

Project map, affected streets highlighted in red

Thole SAVE

The work in your neighborhood is part of Steps to Advance Virginia’s Energy (SAVE), our company’s modernization program aimed at renewing our existing natural gas infrastructure. During this project, we will replace aging, older pipes with new polyethylene plastic pipes that are more durable, reduce our methane emissions and are less expensive to maintain.

Virginia Natural Gas has a long track record of delivering clean, safe, reliable and affordable natural gas service to our more than 300,000 customers across southeastern Virginia. Through our SAVE efforts, we will ensure our customers continue receiving the service they deserve.

Since the SAVE program’s inception, VNG has successfully replaced 100% of low-pressure pipeline from our natural gas system — upgrading over 400 miles of older, aging pipes with more modern pipes. As a result of our SAVE projects alone, we have reduced our greenhouse gas emissions by more than 27% from 2012 to 2019, helping us meet our obligation to provide clean and reliable natural gas service to our customers today and for years to come.

VNG reminds community members to remain vigilant and use extra precaution around any active construction site. Ensure the safety of your children and pets by keeping them away from work areas. When traveling through construction zones, drive and walk carefully, do not park in locations marked as hazardous and follow and obey the direction of traffic signs and on-site crews.

City affected - Norfolk, VA

Streets affected

- | | |
|----------------|---------------|
| Carl St | Fife Ln |
| Fife St | Forsythe S |
