

Take control of your energy bills this year!

Let us help you create a more energy-efficient home in 2020!

Did you know that conserving energy can help you save on your natural gas bill? The Virginia Natural Gas Energy Efficiency Program offers free resources and tools to help customers reduce their energy consumption and save money on their home energy bills.

Money-saving rebates on home equipment upgrades

Replacing your older natural gas appliances with new, energy-efficient models is one way to reduce your energy consumption. New natural gas appliances waste much less energy than appliances manufactured just 10 years ago.

Free online home energy audit

With your VNG account number (available on page 1 of this bill), visit virginiannaturalgas.com/audit to take our free home energy audit that will assess your current energy usage and provide a comprehensive report with personalized recommendations for saving energy in your home.

Free energy-savings kit

When you take the free online energy audit, you can request to receive a FREE energy-savings kit* filled with home weatherization items to help you save energy and money right away.

Our energy-savings kit contents change each year. Our current kit includes the following easy-to-install items to help keep the warm air in and the cold air out:

- Shrink-fit window kit
- 17' roll of closed cell foam weather stripping
- Pack of eight (8) outlet and four (4) light switch foam gasket insulators

For additional tips and tools, visit virginiannaturalgas.com/energyefficiency and take control of your energy bills.

Hurry! Offers expire May 31, 2020 and are good while supplies last.
