

S. Military Hwy-Lockard Ave. Renewal

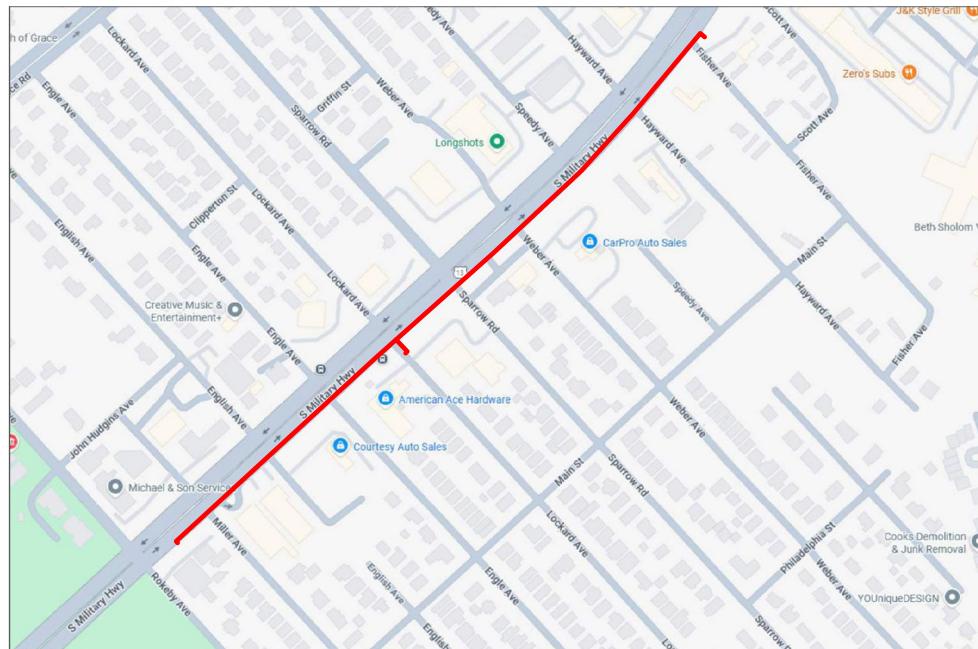

In the coming weeks, Virginia Natural Gas and our contractor, Southeast Connections, will begin pipeline enhancement work in your area. While construction may not take place directly on your street, you may notice activity in surrounding neighborhoods, including occasional lane closures, reduced street parking and the presence of heavy equipment.

Virginia Natural Gas is committed to delivering clean, safe and reliable natural gas to our more than **310,000 customers**. These infrastructure investments reflect our dedication to providing best in class service and ensuring that your energy needs are met safely and reliably now and well into the future. We appreciate your patience as we work to strengthen the reliability of your natural gas service.

This project is part of our ongoing modernization program to update existing natural gas infrastructure. We will replace aging pipes with new, more durable polyethylene plastic that reduces methane emissions and lowers long term maintenance costs. Throughout the project, we will coordinate closely with local officials and use traffic control measures that meet Virginia Department of Transportation standards. Our crews follow the safest construction practices to protect your property and will make every effort to restore it to its original condition. Your natural gas service is not expected to be interrupted.

We remind community members to remain vigilant around active construction zones. Please keep children and pets away from work areas. When traveling through construction sites, drive and walk carefully, avoid parking in hazardous or marked-off locations and follow all posted traffic signs and the instructions of on site personnel.
