

# Pipeline Enhancement Project

Project map, affected streets highlighted in red

## Virginia Beach Oceanfront Pressure Improvement Project

Virginia Natural Gas provides safe and reliable natural gas service to more than 300,000 customers across southeastern Virginia. To ensure that safety and reliability are maintained, we are investing in some critical infrastructure improvements.

In recent years, our community has seen significant economic development, increasing the area's demand for natural gas. This project will make necessary enhancements to our natural gas pipeline system by adding additional capacity to our existing infrastructure to ensure our customers have safe and reliable natural gas when they need it.

The project will be coordinated with local officials and will use traffic control measures that meet Virginia Department of Transportation standards. We take great care in implementing the safest and best construction practices to protect your property during construction and will make every effort to restore it to its original condition. Your natural gas service is not expected to be interrupted during the construction process.

### City affected - Virginia Beach

#### Streets affected

Diamond Springs Rd	S Oliver Dr
Elizabeth Ct	Selma Dr
Independence Blvd	Shore Dr
Pleasure House Rd	Wellings Ct

#### Project scope

- Installation of:
- 14,050' of 12" steel
