Newport News Shipyard Pipeline Project

NEWPORT NEWS SHIPYARD PROJECT

Virginia Natural Gas proudly provides safe, reliable and responsible delivery of natural gas service to more than 284,000 customers across southeastern Virginia. Our pipelines support local economic development and provide a dependable domestic source of energy.

Virginia Natural Gas will be reinforcing our existing natural gas distribution system and extending service to the Newport News Shipyard while maintaining the integrity of our residential distribution system. The pipeline will provide safe and reliable natural gas service to the Shipyard to support their conversion to American, abundant and affordable natural gas for their operations.

As with all of our construction projects, safety is our top priority. Virginia Natural Gas will use directional drilling in neighborhoods, where we will bore beneath the streets, sidewalks and driveways to minimize disruptions whenever possible. Great care will be taken in all phases of the project from beginning to end and all areas will be restored to their original condition.

CITY

Newport News

STREETS AFFECTED

Jefferson Ave 40th Street 39th Street Warwick Blvd Huntington Ave Washington Ave

PROJECT SCOPE

Installation of - 4,300 feet of 8" Steel
